## PROFILE

A proactive individual with a strong grasp of **Java, Android development, Data Structures & Algorithms, and Frontend Development**, seeking to contribute to impactful projects in a dynamic environment. Skilled in building practical solutions and working effectively in team settings. Quick to adapt to new tools and technologies, with a keen interest in continuous learning.

## SKILLS

**Languages:** Java, JavaScript, HTML, CSS, Android, DSA
**Frameworks:** React.js
**Databases:** Firebase
**Tools:** Visual Studio Code, Git, GitHub, LeetCode, Android Studio

## EDUCATION

**Master of Computer Applications (MCA)**                                                2022 – 2024
*GL Bajaj Institute of Technology, Greater Noida*

**Bachelor of Science in Information Technology (B.Sc. IT)**                  2019 – 2022
*Marwari College, Ranchi*

## PROJECTS

**Spotify Clone**                                                                                        2025
*JavaScript, HTML5, CSS3 , Spotify API*                                          *View Project*

- Developed a Spotify-inspired music player with JavaScript that allows users to browse and play songs.
- Integrated with the Spotify API to fetch real-time music data and implemented audio playback functionality.
- Features include playlist creation, song searching, and responsive design for optimal viewing on all devices.

**Todo List Application**                                                                            2025
*JavaScript, HTML5, CSS3, Firebase*                                               *View Project*

- Built a task management application with Firebase backend for data persistence.
- Implemented features like task creation, completion tracking, and priority setting.
- Added user authentication to enable personalized todo lists for multiple users.

**Clock Application**                                                                                 2025
*JavaScript, HTML, CSS*                                                                    *View Project*

- Designed and developed a clock application that displays an analog clock, digital time, date, and the name of the special day (e.g.,"Chocolate Day").
- Implemented real-time updates using JavaScript to ensure accurate timekeeping.
- Created a visually appealing and responsive user interface.

## CERTIFICATIONS

**Core Java**                                                                                          November 2021
*Naresh i Technologies*

**Android Development with Project**                                                       May 2022
*CITC*

## KEY STRENGTHS

Strong problem-solving and analytical skills.

Proficient in debugging, unit testing, and performance optimization.

Excellent teamwork and collaboration abilities.

Quick adaptability to new technologies and frameworks.
